Thamyres Guedes Reis Corrêa

Full-Stack Developer | Front-End Specialist | React - NodeJS - Web3.js

São Paulo, São Paulo, Brasil

Resumo

Bringing more than 10 years of experience leading website design projects, including gathering user requirements, producing code, creating mockups and enhancing designs. Focused on creating clean, robust code with exceptional security.

Resourceful professional with successful track record in developing innovative web designs and features. Possesses solid knowledge of HTML, CSS, JavaScript and UI Frameworks with ability to quickly learn new technologies. Demonstrated success in identifying and resolving complex code issues.

Experiência

Lumx

1 ano 6 meses

Front-End Developer | Tech Lead | Innovation | Blockchain
outubro de 2023 - Present (11 meses)

São Paulo, Brasil

Create innovative projects, using blockchain as core technologies, such as Digital Decentralized Identity with Polygon ID.

Front-End Developer | Tech Lead | Innovation

março de 2023 - novembro de 2023 (9 meses)

São Paulo, Brasil

As a Tech Lead and Front End specialist, I have the opportunity to create innovative products, apply new technologies, focused on the WEB3 market

Produced web apps compatible with multiple browsers and connected to WEB3.

Coded using React.JS (with and without Next.JS) and UI frameworks (Ant Design, Tailwind) to develop features for both mobile and desktop platforms. Contributed to projects within Scrum project management environments.

Researched emerging web technologies and trends for possible incorporation into sites.

Advocated for well-tested and documented, high quality code.

DaX - Digital Assets

Front-End Developer | Tech Lead

janeiro de 2023 - abril de 2023 (4 meses)

São Paulo, Brasil

DAX Assets was the first company where I had contact with technologies and the WEB3 market, which allowed me, in addition to new experiences, to open up my range of technologies:

Solving everyday problems, making decisions with confidence and autonomy in order to obtain good results.

Systems architecture and development and support for legacy systems

Distribution of tasks according to the team's capacity

Advocated for well-tested and documented, high quality code.

Sistema VERI

Project Development Manager

julho de 2022 - dezembro de 2022 (6 meses)

São Paulo, São Paulo, Brasil

As manager of the new product development team, I worked from the conception part, collecting requirements, prioritizing features and defining the software architecture to managing people and processes using the agile culture.

Maximized performance by monitoring daily activities and mentoring team members.

Resolved staff member conflicts, actively listening to concerns and finding appropriate middle ground.

Maintained professional, organized, and safe environment for employees and patrons.

Communicated clearly with employees, suppliers and stakeholders to keep everyone on same page and working toward established business goals.

Launched quality assurance practices for each phase of development

Established team priorities, maintained schedules and monitored performance.

App Masters

Full-stack Developer

agosto de 2020 - julho de 2022 (2 anos)

Juiz de Fora, Minas Gerais, Brasil

As a Senior Developer at a Software House, I participated in the creation and maintenance of several products in different areas, from conception, through UI/UX design to development, acting as follows:

Provided software application engineering and maintenance for development lifecycle.

Reviewed code, debugged problems, and corrected issues.

Developed unit test cases for testing and automation.

Worked as front-end and mobile developer to create apps and webapps

Worked with back-end developers to design APIs.

Participated in requirements gathering to solidify prerequisites and determine best technical solution to meet business needs.

Yunikon

CEO/Founder

junho de 2019 - julho de 2022 (3 anos 2 meses)

Juiz de Fora e Região, Brasil

Yunikon was my first company, founded with the purpose of developing new products, focused on the young entrepreneur market.

As a CEO and developer I had many roles, some even well outside my comfort zone, such as prospecting and sales.

Developed key operational initiatives to drive and maintain substantial business growth.

Conducted target market research to scope out industry competition and identify advantageous trends.

Cultivated forward-thinking, inclusive and performance-driven company culture to lead industry innovations.

Identified business development challenges and customer concerns for proactive resolution.

Developed innovative sales and marketing strategies to facilitate business expansion.

Established and maintained strong relationships with customers, vendors and strategic partners.

Shaped solutions and approaches by leveraging trends in customer marketplaces and industries.

Represented organization at industry conferences and events.

Directed technological improvements, reducing waste and business bottlenecks.

eMiolo.com Solucoes Internet Ltda.

UI / UX | Full-Stack Developer

agosto de 2015 - abril de 2019 (3 anos 9 meses)

Juiz de Fora e Região, Brasil

Reviewed code, debugged problems, and corrected issues.

Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.

Developed unit test cases for testing and automation.

Used NodeJS, ORM and SQL/No-SQL to develop and manage databases.

Worked with back-end developers to design APIs.

Collaborated with fellow engineers to evaluate software and hardware interfaces.

Participated in requirements gathering to solidify prerequisites and determine best technical solution to meet business needs.

Developed and maintained microservices architectures using Docker, Kubernetes and OpenShift.

Developed user-friendly web forms with validation and error handling.

Collaborated with in-house web designers to create sleek and innovative UI design.

Optimized web applications for speed, scalability and security.

Employed coding practices based on commonly accepted standards to establish site layout and user interface.

Collected, defined and translated user requirements into project designs and implementation plans.
